Working Group Updates (WG Chairs)

- **AWG**
  - Deployed CVE Services 2.2.1 (minor patch)
  - CVE Services 2.3.0 was deployed into the test environment and available to community; it includes the CVE Record Format update (schema version 5.1) which supports CVSS 4.0.
  - Anticipate 30 days of testing before moving to production.
  - AWG minutes are now available on the GitHub site.

- **CNACWG**
  - Discussions during meetings included sharing information on the test rollout of the new schema.
  - Reviewed expected changes to CVE Rules and encouraged CNAs to comment.
  - New CNAs are attending meeting and participating, asking questions.

- **OCWG**
  - Published five blogs in the past month.
  - Ongoing messaging on VulnCon event.
• Promotion of CVE Rules for public review and comment.
• Announced start of phase three of legacy downloads deprecation (now files are only updated monthly).

• QWG
  • Discussions about CVE Record Format 5.1.0
    ▪ CVSS issue score validation issue #1204 will be addressed in the schema
      (Note: A patch in CVE Services addresses this in the backend now)
  • Will be discussing CVE Record Format 5.2.0 soon
  • For the updated CSV effort:
    ▪ Will work with AWG on prioritizing fields to include
    ▪ Exploring conversion tools, e.g., JQ
  • Working on planning future schema updates and drafting a process

• SPWG
  • Rule development continues with adjudication of public comments
  • Feedback has been helpful, but less than hoped for
  • Rules are on track per the schedule
  • Board member commented that, during implementation, grace period should be full 90 days

• VCEWG
  • VulnCon has so far registered 365 for in-person and 226 for virtual attendance
  • Within a few weeks following the event, the session videos will be available
  • Board member commented that, during VulnCon, it is important to point out that the data NVD adds can be added earlier in the process directly in the CVE Record by the CNA
  • CVE will have a service desk for technical support during VulnCon

• TWG
  • CSV file format discussion
    ▪ QWG to work on identifying conversion tool and fields supported
  • CVE Record Format schema transition planning review
    ▪ Comments from Board members
      • We may need a Board vote on CSV format question
      • Should focus on modernizing, not old formats
      • CVE.org site should list tools the CVE Program considers potentially useful (ACTION)
      • The program should give major agencies (i.e., DoD) a heads up on file format deprecation and need for tooling
    ▪ ACTIONS:
      • QWG Co-Chair will connect Board with DISA Risk Mngt Dir
      • Board member volunteered to send email to DoD regarding CSV deprecation and tooling need

• Vote on Potential Board Member
  • The Board has not achieved consensus on what to do with the idea of an Organization Liaison position
  • Consensus that the Board should conduct vote on potential Board member:
    ▪ Secretariat will draft the vote description and instructions and the vote will be initiated
    ▪ Board member volunteered to contact potential Board member with an update and note that vote will take place, but position details are still in debate
Open Discussion

None, out of time

Review of Action Items

Out of time.
