

Scope of Riverbed as CNA

Riverbed Technology, Inc. (Riverbed) is a provider of application performance infrastructure. The company offers a platform to deliver, control and optimize IT resources across the hybrid enterprise. The Riverbed Application Performance Platform delivers application performance infrastructure solutions with a focus on two areas, which include application acceleration and performance management.

As a CVE Numbering Authority (CNA), Riverbed will assign CVE Entries to all Riverbed products. This applies to all products in Riverbed across all business units.

The entire list of Riverbed products is given below:

Any security issues or vulnerabilities in Riverbed products should be reported at the email: product-security@riverbed.com

Riverbed will validate the reported issues and respond as per Riverbed's Product Security Response Team (PSRT) process. The priority of the bug shall be determined by Riverbed using the CVSS 2.0 severity scoring format, similar to how Riverbed already deals with responding to CVEs.
